We proudly announce a new generation Mylar seals

With the Mylar tapes and sealing kits we provided our customers an easy possibility to improve the performance and handling characteristics of their aircraft.

These options we developed and improved now for over 30 years to meet the requirements of the market and technology to set new standards. And now we proceed this tradition with our new **super white** Mylar which matches perfectly the color of gliders and motor gliders with as well as the advantage of better bonding.

Test our new super white Mylar with the introduction price similar to the price of our old standard seals till 31.08.2016.

No question you will still get the standard seals parallel as you are used to in our premium quality.
